## Goldmedal Electricals launches IoT enabled i-Touch Wi-Fi 6 module smart switch

Channel, Technology 6th November 2019 PRINT EMAIL A- A+

Goldmedal Electricals, a leading home-grown fast moving electrical goods (FMEG) company, has introduced the latest version of its IoT enabled i-Touch Wi-Fi range of switches, the "i-Touch Wi-Fi 6 Module". Goldmedal Electricals has been at the forefront of introducing innovative home automation products that can be controlled manually, via remote control, a mobile app or through voice commands such as Amazon Alexa and Google Assistant. Goldmedal's home automation products are aesthetically appealing as they are sleek and sophisticated thereby adding a touch of luxury into your home.

The Goldmedal i-Touch Wi-Fi 6 module switch is the latest entrant in Goldmedal's home automation portfolio. This product is similar to Goldmedal's other home automation products and can be installed directly in an existing junction box using the same wiring. The setup process is hassle-free, without the need for replacement of the existing wiring. Goldmedal's i-Touch Wi-Fi 6 Module Switch is available at all major retail outlets at a starting price of Rs. 9,999/-.

Goldmedal's i-Touch Wi-Fi 6 Module switch includes:

- Six switches
- A fan regulator
- Two USB sockets
- An international socket

This is a complete system in itself. Install this in a regular junction box and you can easily control almost every electrical fitting in any room easily.

Commenting on the launch of this smart product, **Mr. Kishan Jain, Director, Goldmedal Electricals**, said "Today, IoT based home automation is fast catching up in the country with consumers opting for products that offer them both convenience and simplicity. Our aim is to introduce innovative products & solutions that offer our customers comfort, with all our products designed & developed after intensive research. Through the launch of our i-Touch Wi-Fi 6 Module smart switch, we are providing consumers with the ability to control all the electrical appliances in their home through the touch of a button / voice command."

Digital technologies have made almost everything possible with just the click of a button. Home automation not only offers users better control over devices but also reduces power consumption and provides a seamless user experience.
