WiFi Switches with remote and voice control unveiled

The i-Touch Wi-Fi switches are equipped with a microcontroller chip which is used to save parameters pre-set by a user for easy operation. The switches come with remote control and support for I-World mobile app using which customers will be able to control, set scenes and know the status of the switches at a given time. Goldmedal Electricals introduced i-Touch Wi-Fi Switches, a range of home automation switches which can be controlled manually, through a remote control and mobile app. The switches are also enabled with Amazon Alexa and Google Assistant which will help in voice activation and commands. The Goldmedal i-Touch Wi-Fi switches will be available for a starting price of Rs 5,900. The i-Touch Wi-Fi switches are equipped with a microcontroller chip which is used to save parameters pre-set by a user for easy operation. The switches come with remote control and support for
